ENERGY**

## **BE PART OF CREATING WALLOWA COUNTY'S GOOD ENERGY FUTURE!**

In order to proactively plan and manage its energy future, Wallowa County has just launched a Community Energy Strategic Planning (CESP) process. It will create an energy blueprint for the next 10-20 years—with a special focus on lowering energy costs, keeping energy dollars working locally and stabilizing energy access for the County's "end of the line" communities.
